GREATER TZANEEN MUNICIPALITY ANNUAL REPORT – 2006/07

Vision:

To be the fastest growing economy in Limpopo, that will ensure access to basic services to every household.

Mission:

To stimulate economic growth through sustainable integrated service delivery and partnerships.

Prepared By: Greater Tzaneen Municipality February 2008

Final DRAFT

Mayors Foreword

The purpose of this report is to provide a record of activities of the Municipality, to provide a report on performance in service delivery and budget implementation and to promote accountability to the local community. During the previous financial year, much was achieved towards the achievement of Good Governance, Service Delivery, Local Economic Development, Financial Viability and Municipal Transformation and Organizational development.

Our priorities as Greater Tzaneen Municipality remain those identified in the Council's Integrated Development Plan, i.e. service delivery of water, sanitation, electricity, housing, health and education. The Council confidently wishes to indicate its tremendous progress achieving certain delivery challenges. As Council we would like to appreciate the effort and good leadership shown by the Municipal Manager, Departmental Managers, Divisional Managers and all staff in general, for the focus on achieving the best in service excellence. For the past seven years of democratic local government, the Greater Tzaneen Municipality has worked together with citizens of the municipality to improve the lives of our people. The Council has done a lot, but we still acknowledge that much more needs to be done. If we continue to work together, and learn from our past experiences we can move even faster to realize the goal of a better life for all.

Access roads have been tarred in most of our villages and electricity and water is accessible to most of our communities. The Council has built more houses in partnership with the Department of Local Government and Housing. Waste removal has been improved and many of our people enjoy free basic services through indigent support. Our indigent register is being managed effectively and is working for the needy in giving free basic services to them. However the Council is mindful of the profound responsibility of improving the lives of our people on a continuous basis.

Our Municipality has become the District's business location, and the number one choice for corporate activities, including the District's main centre for finance, business services, information technology and also acts as gateway for agricultural products.

Some Highlights/ Achievements for 2006/2007

Service Delivery and Infrastructure Development:

- Continuous Implementation of the indigent register.
- Winners of the Silver Award regarding the successful implementation of Mawa Block & PHP housing.
- Winners of the Cleanest Town Competition in Limpopo and runner-ups for the National Cleanest Town in South Africa.

Financial Viability:

- Timeous submission of Annual Financial Statements as per legislative requirements
- Budget and expenditure management as per approved budget

Municipal Transformation and Organizational Development:

• Reviewed organogram and job evaluation process.

Good Governance:

• Approved reviewed Integrated Development Plan.

The PHP housing programme of Sedan is at an advance stage and we are completing it very soon. We hope an award will be received out of them since we are committed in providing to our people quality and desirable houses.

All this could not be have been realized without teamwork and the invaluable support and contributions of everybody in Council.

My acknowledgements would not be complete without thanking the Councillors, acknowledging the new Council including the Speaker, the Executive Committee,

Traditional Leaders, the Municipal Manager and his Staff, but above all I want to thank the Citizens of Greater Tzaneen for their unwavering support.

Thank You Alderman OJ Mushwana Mayor

1. Introduction and Overview

1.1 Overview of the municipal area

The Greater Tzaneen Municipality is situated in the eastern quadrant of the Limpopo Province within the Mopani District Municipal Area. GTM covers approximately 3240 km², and extends from Haenertsburg in the west, to Rubbervale in the east (85km), and just south of Modjadjiskloof in the north, to Trichardtsdal in the south (47km). The Greater Tzaneen Municipality area encompasses the proclaimed towns of Tzaneen, Nkowankowa, Lenyenye, Letsitele and Haenertsburg. In addition, there are 125 rural villages, concentrated mainly in the south-east, and north-west. Almost 80% of households reside in these rural villages. The area is further characterised by:

- Extensive and intensive farming activities (commercial timber, cash crops, tropical and citrus fruit production);
- Mountainous, inaccessible terrain in the west and south, and un-even topography (gentle slopes) to the north and east;
- Areas with exceptional natural beauty, with considerable untapped tourism potential.
- Large areas in private ownership and also in the ownership of the state under the custodianship of six Traditional Authorities.

Greater Tzaneen Municipality has an estimated population of 396 711¹ for 2006. According to the 2001 Census 54, 4% of the GTM population where female and 44% where below the age of 18 years. The municipality therefore have a very youthful population. Also, 22% of the GTM population had no schooling in 2001. All these factors contribute to the high unemployment level in the municipality. However the municipality also has great potential in terms of the strong agricultural and tourism sectors.

Priority Areas

Due to the service delivery backlogs that exist in our municipal area our priority areas are:

.

¹ Global Insight Database, 2007

- Developing Tzaneen's exporting opportunities and national status as the fruit basket of South Africa
- Encourage tourism growth for economic growth
- Direct community well-being by addressing poverty and making basic services accessible and affordable
- Establish sustainable governance through excellence systems
- Demonstrate effective and efficient service delivery
- Optimise operational expenditure for capital growth
- Maximise revenue generating possibilities

2. Performance Highlights

2.1 Civil Engineering Department

2.1.1 Water and Sewerage Division

The purpose is to provide 24 hour service portable water to households through the following key performance areas; water by-laws, National Water Act, purification plants and boreholes and maintenance of the system.

Programme Performance Analysis

Water Provision

Achievements:

- Purified water in all rural and urban areas. Upgrading of Tours plant.
- Ritavi 1 (Nkambako) purification plant upgraded and
- The Xihoko rising main upgraded

Challenges:

- Revised and reliable water services delivery plan
- The finalization of section 78 process
- The revision of the abstraction Licences.
- The issue of water quota, which also affect the development in the area.
- The current financial status of Greater Tzaneen Municipality.

Boreholes

Achievements:

• 24 Boreholes up graded from the Premier Emergency Funds (PEIG)

Challenges:

- Vandalism,
- Illegal connections,
- Maintenance of DWAF's plants and boreholes

Sanitation

Achievements:

• 6121 Ventilated improved, pit latrines have been constructed to improve sanitation facilities and promote health and hygiene to rural communities.

Challenges:

The increase in the backlogs.

2.1.2 Roads and streets Division

The purpose is to have clear, access to all households in Greater Tzaneen Municipality area in terms of roads and a proper channel of storm water to the river streams.

Programme Performance Analysis

- Tarred roads (maintenance)
- Storm water
- Gravel roads (funeral roads)

Achievements:

- Keeping all funeral roads accessible, all pot holes patched
 - Tzaneen patch works: 3,574,597 m²
 - Letsitele patch works: 443,936 m²
 - Lenyenye patch works: 316,365 m²
 - Nkowankowa patch works: 988,804 m²
 - Haenertsburg patch works: 67,712 m²
- Constructed 6 225 m² of stone pitching
- Constructed a length of 82 m of concrete pipe in the rural areas.
- 188 km of gravel road constructed and
- 22 400 m² of parking created during funerals

Challenges:

- Not enough funding
- Under Staffed

2.1.3 Building and Maintenance

The purpose is to ensure compliance with SANS code of practice 01400, compliance with Municipal by-laws and compliance to national building regulations and building standard act.

Programmes Performance Analysis

Building control:

Achievements:

- Approved 704 building plans
- 15 Contravention notices issued

Table 1 provides an overview of the Building and Zoning plans considered during 2006/07.

Table 1: Building and zoning plan, 2006/07					
Category	Applications outstanding 1 July '06	Number of new applications received 2006/07	Total value of applications received (R)	Applications outstanding 30 June 2007	
Residential new	9	296	114,923,600	9	
Residential additions	3	227	45,707,200	3	
Commercial	-	9	27,707,200	-	
Industrial	1	2	2,945,600	1	
Other (Church)	-	1	3,865,400	-	

Challenges:

- Rapid growth of development in Tzaneen Town.
- Shortage of personnel (Engineering Technician and Building Inspector)

Building maintenance

Achievements:

- Successfully completed the Mawa PHP project 115 units completed.
- Mawa PHP received the Impumelelo innovations award (silver award and price worth R20 000)
- Renovated buildings of Greater Tzaneen Municipality and sewer pump stations.
- Renovated all four Thusong centres.

- PHP housing not funded yearly, this result in fact that trained people are not sustained.
- Shortage of Building Inspectors for rural housing.

Fleet management

Achievements:

Successfully managed to lease 31 in number vehicles consisting of 14 LDV's,
 9 LDV's 4 x 4, one Solid Waste compactor, one Sedan for Traffic Division,
 Two Tipper Truck for Solid Waste, Water tanker and one 4 ton truck.

Challenges:

- Ageing of vehicles which results in high maintenance costs.
- Shortage of personnel (Superintendent position)
- Unavailability of spares due to the old models of vehicles and trucks.

2.2 Community Services Department

2.2.1 Environmental Health Division

Programme performance analysis

Community Health

The devolution of powers and functions for Primary Health Care has resulted in the municipal clinic being transferred to the Provincial Department of Health and Social Welfare. A Service level Agreement was signed and the transfer effected on 1 July 2007. This has not hamper service delivery, the clinic continued to be the preferred health facility and we have recorded 25021 clinic visits in the period under review.

On HIV/ AIDS we have the pleasure to inform Council that the AIDS Council has been elected and the establishment of its sub-committees has been completed. The department of Health and Social Welfare has provided us with the services of a lay counsellor. As a result we see a steady increase in the number of people making use of our Voluntary Counselling and testing services, we had a total of 276 clients. Sadly most of those counselled do not go for testing.

Environmental Health

During the period under review, we have, implemented the following programmes:

- Food Hygiene Management
- Industrial Impact Management

- Environmental Education and Awareness
- Water Quality Management
- Environmental Management

Our major highlight of the year is with regard to the Cleanest School project on the Environmental Education and Awareness programme. Since it's inception in 2002, we have seen a record entry of 89 schools, which is a 50% increase on the entrants. In Water Quality Management, 85% of the water samples taken comply with the requirements of the South African National Standards (formally SABS)

2.2.2 Law Enforcement Division

Programme performance analysis

Achievements:

- 17375 Summonses issued.
- 2767 Warrants executed
- 1025107 Rand value collected
- 14 Road Safety interventions at schools, Minitzani and Bona Tsela Mini Traffic Centre.
- 430 accidents attended to
- 443 road signs erected and repaired

- We have had a total of 93 Access cards lost and
- 17 criminal cases reported for theft other challenges include
- Staff shortages. The current budget do not allow for the absorption of the four seconded officers from the province.
- The areas we need to cover during emergencies are far and wide including Haenertsburg, Gravelotte, and Moketsi/ Giyani
- Lack of funds offices cannot attend courses and workshops.
- Payment of damages allowance to officers
- We struggle to purchase uniforms and equipments due to lack of funds.
- Lack of enough office accommodation to accommodate officers.

- Need far extra cameras to curb ongoing thefts of council property.
- Investigation into municipal court cannot be kick-started due to lack of funds

2.2.3 Library Division

Programme performance analysis

Library development and reading promotion:

Achievements:

- 83,833 library users benefited from the information resources available in the libraries.
- 121,078 books/magazines were circulated.
- 100 School groups were hosted.
- 387 learners participated in the annual library competition.
- Positive articles on GTM Library Service's Paired Reading project appeared in a popular national and a prestigious international magazine: *Let's Read!* BONA, December 2006, p.88 89. *Enhancing Reading in Different Worlds*: South Africa and Australia THE READING TEACHER (International Reading Association) vol. 60, No. 5, February 2007, p. 300 302.

Challenges:

- Lack of sufficient staff at the Tzaneen Library, and
- The highly insufficient delivery of relevant new books from the Provincial Library Services is the main challenges facing the GTM Library Services.

Arts and culture programmes – book related:

Achievements:

- 4 Full scale holiday programmes and 2 shorter programmes were hosted, with the emphasis on arts and crafts, using inexpensive materials.
- 3 Major and 8 smaller cultural events were hosted. The highlights were the creative writing workshops presented by internationally renowned Belgian writers, poet Daniel Billiet and youth novelist Marita de Sterck from 30 September 7 October 2006.

Assisting schools in establishing book collections:

Achievements:

 264 Relevant books were donated to schools via the GTM Library Committees, 18 Special Biblionef donations of trunks full of books were secured for GTM schools and 8 GTM schools received boxes filled with books from Biblionef.

Challenges:

- Communities from all over the Greater Tzaneen Municipality area and beyond
 use the Greater Tzaneen Municipal libraries. For communities outside
 Tzaneen, Letsitele and Haenertsburg transport costs are a factor, impacting
 negatively on the disadvantaged.
- The high cost of establishing and operating much needed new municipal libraries,

2.2.4 Licensing and Testing Division

Programme performance analysis

Achievements:

- 12155 Vehicles registered
- 43901 Vehicles licensed
- 365 Permits issued
- 5943 Learners licenses issued
- 10479 Drivers licenses issued
- 2708 Professional Driving Permits issued
- We also assisted with the capturing of traffic fine payments and By-law applications (dog licenses and temporary advertisements).

- Communities from all over the country and beyond our boundaries are making
 use of our driving license facilities and this creates a backlog and is also to the
 disadvantage of our local communities.
- A shortage of sufficiently trained staff also creates long waiting periods in queues.
- The driving schools cause overcrowding at the testing stations and attempts to control the process.

2.2.5 Parks

Programme Performance Analysis

- The main programmes of Parks, Recreation and Cemeteries are:
- · Open spaces and parks maintenance and management
- Recreational facilities maintenance and management
- Cemetery maintenance and management
- Swimming pool maintenance and management

Achievements:

We have maintained 79718m² of developed parks in the five towns as well as 329,286m² open spaces. We also assisted with ensuring that proper, dignified burials take place, considering our cultural diversity. Furthermore, we decorated various venues for District and Provincial events, on request.

Challenges:

The Lenyenye cemetery is nearing full capacity, efforts to secure land are being made by the Department of Planning and Economic Development. We need to develop play parks in all the five towns.

2.2.6 Solid Waste Division

Programme Performance Development

Waste minimization:

Achievements:

• 100 % operational composting plant exists adjacent to the Landfill.

- Formal recycling system to be implemented in the CBD of one area per annum.
- Gas extraction system on the landfill site to be investigated.
- Rural Waste Minimization to be implemented at 8 schools, 2 per cluster per annum
- Personnel procurement (waste minimization programme)
- Tender procurement (operations)

Collection and transportation.

Achievements:

• Kerbside collections at all urban premises

Challenges:

- Vehicle fleet 18+- years old.
- Need a Health Care waste storeroom.
- Need a Health Care waste removal vehicle.
- Need stand-by vehicles.
- Tender procurement(operations)
- Personnel procurement

Disposal and treatment:

Achievements:

- Disposal of all collected refuse at permitted site
- Composting of all collected organic matter at a low technology composting plant
- Treatment of all collected Health Risk Waste at permitted incineration plant

Challenges:

- Permits Investigate closure of Landfill [Permit Issued on 1/12/2004]
- Construction plan Plan and 3 D Model to be developed
- Continuation of Annual audit tender by the Supply Chain Management Unit
- Tender procurement (operations)

Pollution control:

Achievements:

• 90% Operationalization of all functional ablution facilities

- Policing of illegal dumping No regular policing.
- Court procedures Lack of Municipal Court & sentences.
- Public toilet cleansing of all municipal facilities to be transferred to Solid Waste.

- Personnel procurement for policing & awareness
- Operationalization of 1 ablution facility at Lenyenye

Management & ICT systems:

Achievements:

- To address the broader environmental management issues GTM established a clean town task committee (chaired by the Waste Management Division) to meet monthly. Five sub thrust committees were established viz:
 - o Bio-diversity & air quality.
 - o Pollution control & waste management
 - o Water management.
 - o Land management.

- Administrative support for the capturing of information
- Budget control and support
- Lack of appropriate software.
- MIS no waste info system from provincial & national
- GIS lack of operational software
- Integrated management lack of dedication. Solid waste management is a small portion of the total approach to ensure compliance with environmental requirements as per "provincial indicators to ensure IDP compliance with environmental requirements"
- Support services {Budget; HR; IDP; Legal; Public participation & Community mobilization}.
- These committees must also develop environmental projects to address environmental gaps as per guidelines. Such projects are registered within the IDP
- Budget constraints: unfunded projects exist due to budget constraints.
 Integrated Waste Management Plan was developed in house but the need to validate the plan exist
- Supply Chain management unit is not functioning effectively resulting in outstanding tenders which should have been completed in February 2006.

2.3 Corporate Services Department

See Chapter 3.

2.4 Electrical Engineering Department

The purpose of the Electrical Engineering Department is to provide a sustainable electricity service to all consumers, and potential consumers within the Council's Distribution. The key service delivery areas include; Legislation, Electrification, Maintenance, Capital Programme, Client services and Community Lighting.

Programme performance analysis

Electrical By-laws:

Achievements:

Initiated total rewrite of Electricity By-Laws. Old By-Laws originated from 1930's.

Challenges:

With the RED's imminent the challenge is for GTM to draft By-Laws that could be considered an industry standard. Extensive use was made of inputs from the AMEU (Association of Municipal Electricity Undertakings)

Electrification of Farmworker Houses:

Achievements:

1229 Farmworker houses were connected to the grid. Projects were funded by the Department of Minerals and Energy through the Integrated National Electrification Programme.

Challenges:

Some farmers are reluctant to pay for the infrastructure and electricity consumption by the workers. A lack of experience in some of the emerging consultants and contractors negatively affected the projects.

Electrification (Eskom Licensed area):

Achievements

950 households were electrified.

Challenges:

Insufficient funds to eliminate the estimated backlogs of 37 756 connections.

Electrification (Municipal Area):

Achievements:

153 new connections were provided to the municipality's distribution network.

Challenges:

No infrastructure capital for the bulk supply.

Electrification of Schools and Clinics:

Achievements:

No Projects for electrification of Schools and Clinics.

Challenges:

The electrification of schools and clinics is not discussed in the energy forums due to non-attendance of relevant Eskom's officials or information regarding the allocations and priority list. The priority list for schools and clinics is also not handled by the Municipality.

Maintenance of Distribution Network:

Achievements:

Ongoing corrective and preventative maintenance of the network

Challenges:

- Increasing abnormal corrective maintenance due the poor state of the distribution network.
- Funding required

Refurbishment of lines:

Achievements:

38km of lines refurbished

Challenges:

The increasing cost of materials to refurbish overhead lines.

Customer complaints, queries and requests:

Achievements:

24 Hour service available to customers for power related complaints.

Streetlights:

Achievements:

Ongoing maintenance conducted.

Challenges:

Lack of funding for installation of community lights in rural areas. Unavailability of power sources in some areas.

Capacity:

Achievements:

Electricity Recovery Plan Developed

Challenges:

Funding is an enormous challenge. Application to various Government Departments and the Deputy President has been made for R420 million (still awaiting feedback). Meanwhile an estimated R1,5 Billion of developments are on hold until the electricity capacity problem can be addressed. This is having a severe negative impact on Tzaneen's growth.

2.5 Chief Financial Officer

2.5.1 Expenditure Division

Programme Performance Analysis

Achievements – The division has maintained the payment of creditors within the stipulated maximum period of 30 days. All statutory payments were made as and when due.

Challenges – The stores section has experienced staff challenges with two of its officials suspended. Since these were suspended with full pay their positions could not be filled. To alleviate the problem the services of two temporary employees were engaged. One of the temporary employees however resigned and the contract of the other employee was not renewed as there was impending investigation against him

related to his services at the workshop where he was stationed before moving to the stores section.

2.5.2 Financial Services and Reporting

Programme Performance Analysis

Drafting of the Budget

Achievements:

Budget approved within the legislated timeframes

Challenges:

To keep expenditure requests within the anticipated income

Financial Reporting

Achievements:

All reports that could be generated through the existing system were submitted to the Stakeholders (National Treasury, Provincial Treasury, Mayor and Council) within the prescribed timeframes.

Challenges:

2 Reports (Asset report & Budgeted financial statements) required by National Treasury cannot be generated through the existing system.

Investments

Achievements:

Investments are made if access funds are available.

Challenges:

To ensure that long-term investments grows sufficiently to repay loans.

2.5.3 Revenue Collection Division

The purpose is to collect all revenue due to the municipality through Billing and Revenue collection.

Programme Performance Analysis

Billing:

Achievements:

- The audit of the billing system of Nkowankowa and Lenyenye was successfully conducted and finalised during April 2007 as per Council Resolution B36(d) – C2006 05 30 and
- The approval by the Municipal Council in May 2007 (Council Resolution A13(b) – C2007 05 29) of an action plan to deal with the cleansing of the billing system based on the outcome and findings of the audit.
- Another achievement is the 8% improvement achieved during the 2006/2007 financial year on the water and electricity meter reading service.

Challenges:

- The refusal of access to some properties and provision of information by the owners has limited scope of the audit.
- The postponement of the implementation of the electricity tariffs to 01 November 2006, due to the discrepancies on the billing system regarding tariffs information and meter readings.

Revenue Collection:

Achievements:

The implementation of the debt moratorium strategy in Nkowankowa and Lenyenye on 01 July 2006 with the objective of improving payment rates and write-off debts based on the responsiveness of the indebted households to the conditions of the strategy.

Challenges:

Implementation of the debt moratorium strategy, prior to conducting a audit of the Nkowankowa and Lenyenye billing system, affected the enforcement of credit control and debt collection mechanisms. The low payment rates in Nkowankowa and Lenyenye remains a challenge

2.5.4 Supply Chain Management Division

Programme Performance Analysis

Achievements:

Bid Committees were successfully established and are functional.

- Staffing is still a problem for the unit. During the financial year the actinghead of the division resigned putting a strain on the remaining few members of the unit. Due to the staffing problem the stores section has not as yet been incorporated into the division.
- Delays were experienced in finalising some bids due to unavailability of bid committee members. To address this it is planned that a fixed timetable of meetings will be introduced.

2.5.5 Information Technology Division

Programme Performance Analysis

Challenges:

- The absence of wireless connectivity hampered the process of linking the MPCCs with the network. The centres also have no printers due budget constraints.
- Due to budget constraints it was not possible to provide IT equipment to all officials who needed them.

2.6 Office of the Municipal Manager

2.6.1 Disaster Management Division

Disaster Management Division assisted the following communities / villages with tents and food parcels (See Table 2).

Table 2: Disaster relief provided during 2006/07

Programme Performance Analysis

Disaster prevention services were provided at the following special events:

- Electricity Switch on Ceremony held at Muhlava Sports Ground on the 26th
 January 2007, by the Minister of Minerals and Energy ,Ms Buyelwa Sonjica.
- Inter High Schools Athletics held at Ben Vorster High School on the 24th February 2007
- District O.R.Tambo Games held at Tzaneen Primary School on the 24th February 2007
- Japanese Projects: Opening of Clinics: 15 March 2007
- Water Week held at Ga- Masoma Sports Grounds on the 22nd March 2007.
- Launching of Mopani Arrive Alive and the establishment of JOCS for the Easter Weekend, held between Lenyenye Cross and Muhlava Cross on the Tzaneen – Lydenburg road on the 5th April 2007.
- Mass Funeral for the Maenetja's family on the 12th May 2007.
- Theunis and Juanita Music Festival held at Ben Vorster on the 20th June 2007.
- Ben Vorster / Merensky Sports Day held on the 9th June 2007
- Letaba Air Show held on the 30th June 2007
- Tzaneen Reality show Tour held on the 29th June to 01 July 2007

Workshops / Training Attended and Conducted:

- Disaster Management Workshop for training of Councillors held at Karibu Lodge on the 7th of February 2007.
- Strategic workshops held as follows: Eagles View from 7 9 May 2007,
 Swadini Forever Resort from 14 18 May 2007.

2.6.2 Communications and Marketing

Programme Performance Analysis

Internal and External Communication

Achievements:

- The division was able to produce 1000 x 1 copies of internal newsletters (February 2007) and 5000 x copies of external newsletters (December 2006).
- Monthly update of the telephone contact list

- Internal communication of events, programmes and campaigns through email and sms
- Municipal articles, pictures and news forwarded to SALGA-Limpopo
- Regular media briefings with the media, issuing of media alerts, press release, live radio broadcasts to ensure that council's image is endlessly promoted to attract investment to the town and the general public.
- Weekly media monitoring and accurate responding to articles or comments.

Challenges:

- Financial constraints failed us to produce newsletters as per target
- Lack of working tools e.g. good quality cameras, editing software for the videos and picture, user friendly colour printer.
- The division is unable to communicate to internal clients due to lack of access to All users (email)
- Management decisions impact on the implementation of the communication strategy and policy – lack of support from management to take lead with communication programmes.
- Budget constraints failed the division in 2007 to purchase daily newspapers for monitoring purposes

Marketing, Advertising and Campaigns

Achievements:

- The office of the Premier facilitated a branding workshop to educate and encourages the five towns to be branded as cities.
- Annual exhibition at the Zulu kingdom Tourism Indaba Durban, and the Letaba Show.
- Regular website update.
- Turf Community Radio gala dinner fundraising event attended by communicators in Tzaneen
- Design branding for the Municipal vehicles with the new coat of Arms
- Produced 2000 colour-coded Council posters and distributed to internal and external clients

- Very limited budget for advertising and marketing
- Marketing functions transferred to the division with the Marketing strategy for the Institution limited to tourism elements only and is not yet finalized.
- Delays to finalize the Marketing strategy by the service provider (DBSA grant project)

Outreach Programmes

Achievements:

- Municipal participatory budget, IDP/PMS ward meetings March 2007
- Visited 16 schools within the GTM- in four clusters. Politicians from Legislature and local councilors supported the programme.
- The First Lady of the Province, Mrs. Moloto visited one of our Farm schools at Appel to celebrate her birthday with the children, as a way of motivating the children
- She brought along with her the business community who donated stationery, a R70 000 printer; umbrellas and school bags
- GTM hosted the launch of the district Izimbizo programme October 2006
 through the SABC Munghanana Lonene FM outdoor broadcast. All Mayors
 except for Ba-Phalaborwa were present to provide response to the talk back
 question after the Executive Mayor made his district overview ito service
 delivery and the action plan of the district.
- GTM conducted izimbizo in seven venues (October 2006), and ito of attendance communities came in numbers and participated
- In April 2007, four areas were visited with one venue as a joint izimbizo with Greater Letaba Municipality.
- One service awareness was held at Relela Thusong Services Centre (July 2007). The following departments participated i.e. Office of the Premier; Dept. of Home Affairs; Dept of Correctional services; Dept. of Labour; DWAF; Dept of Agriculture; SASSA; HURESIC; Nhlayiso Community Health; SAPS-Maake/Tzaneen; FAMSA; Dept of Health and Social development

Challenges:

• Financial constraints to support in terms of logistics at Appel school

- There was poor coordination from District GCF—wherein GTM has to take responsibility to engage the district MM.
- Financial constraints to implement for the three remaining Thusong Services

 Centre
- Bulamahlo is regarded as a hub due to its high volume of clients and there are challenges for SAPS Maake to support Home Affairs and SASSA services during additional days.

Business Cards and diaries

Achievements:

- Business cards produced regularly and distributed to EXCO members,
 Managers and HODs, and some officials on request.
- 2007 diaries with names of officials and politicians were bought and distributed.

Challenges:

- Financial constraints
- The distribution strategy was a challenge- some diaries were collected very late

Thusong Service Centres

Achievements:

- Each TSC operates once a week Mondays to Thursday
- Functional local Inter sectoral steering committee (LISSC)
- Well kept action oriented minutes with eight meeting held
- Renovations completed at all centres
- Bulamahlo TSC well resourced with functional tele centre equipments and computer courses have started.
- Digital doorway installed at Bulamahlo TSC and is in use by young people
- A grant (NDPG) has been received from Treasury to develop these TSC in GTM and task team is in place to facilitate implementation of the project.

Challenges:

• Poor management of all centres, no dedicated personnel.

- Lease agreement finalization with the owners of the existing buildings on use (ownership problems) impacts on who pays for services and who is paid for lease by sector departments.
- Partitioning of offices at Bulamahlo TSC are still pending
- Sector department such as Education; Sports, Arts & Culture; Justice; Economic Development & Tourism, and Local government & housing are not participating in LISSC
- Lack of secretariat support for LISSC meetings
- Lack of support and cooperation from SAPS-Ritavi at Lesedi TSC during Thursdays.

Communication Cycle for Local Government

Achievements:

- Held eight meeting of the LGCF and implemented the under mentioned events and programmes
- District Mayor's Inauguration ceremony -01/07/2006
- Service Awareness for Relela Thusong Community Centre 07/07/2006
- Recognition Day- 14th December 2006
- District launch of Izimbizo focus week 20 October 2006 and April 2007
- Back-to School Campaigns wherein the first Lady, Mrs. Moloto visited Appel school due to their poor performance –grade 12 for motivations and support through donation of equipment and learning materials
- SONA viewing in all clusters
- GTM Budget speech and approval of IDP 15 May 2007
- Executive Mayor's Charity cup 29 /07/2006
- Letaba show exhibitions –August 2006
- Tourism Safety summit and Gala dinner-12/10/2006
- Official Switch-on of the Mhlava-sasekani electricity project by Minister Bulelwa Sonjica – 26/07/08
- Official opening of Clinic and Visiting Points -15/3/07
- National water week at Masoma Tours 19-23 /03/07
- Handing over of Lenyenve Community hall to GTM March 2007

- Human Rights Day celebration Integrated Service provision at the site –
 21/3/07 Booysens and Henley farm (Deeside farms)
- Municipal LED summit at Nkowankowa community hall 20/3/07
- District Sanitation road show at Giyani 30/03/07
- Freedom Day at Maruleng showground 27/04/07
- Cleanest school competition

Challenges:

- Lack of dedicated budget to implement the calendar of events
- Internal departments are not communicating their event during planning –
 there is a need for coordination centre of events
- Some sector departments are still coordinating events without involvement of the LGCF or the Municipality
- Logistics support of district, provincial and national events becomes a challenge as they are not communicated in time for inclusion in our local Communication strategy and action plan

2.6.3 Internal Audit

Programme Performance Analysis

Achievements:

- Annual risk analysis conducted.
- Three year strategic and annual plan finalized.
- Annual stock taking conducted and report submitted to council.
- Audit queries and quarterly report issued to management and audit committee.

Challenges:

- Shortage of staff and offices.
- Relied on District Audit committee which was not effective, as the Audit Charter developed did not cover the local municipalities.
- Reluctance on the part of Management to implement audit recommendations.
- Follow-up audits limited due to the shortage of staff.

2.6.4 Public Participation and Project support

The purpose of Public Participation and Project support is to ensure public participation in local governance. This is done through the IDP Repforum, ward committees, project steering committees and Community Based Planning (CBP).

Programme Performance Analysis

Good Governance

Achievements:

- 34 wards committees were established
- Cluster committee district ward committees forum is established
- Specialised committee on Public Participation is in place

Challenges:

- Lack of moral support from councillors
- Financial constraints particularly for ward committees
- Lack of understanding of roles & responsibility between cluster committees and district ward rep forum

Project Support

Achievements:

The projects which are facilitated by the division are presented in Table 3 and 4.

Table 3: Projects supported through training				
Name of project	ame of project Training Courses

Challenges - Lack of understanding of integrated services from sector Departments.

2.7 Planning and Economic Development Department

2.7.1 Local Economic Development and Tourism Division

Responsibilities of Land Economic Development include the following:

- Mefakeng Community Tourism Development Project (Irish AID)
- GTTA Tourism Association
- Agricultural Development
- Land Claims Settlement Support
- Fruit and Nut Value Chain
- SMME Development (SEDA Small Enterprise Development Agency)
- Skills Development (Department of Labour)
- Informal Business (Hawkers Support)
- Development of Shopping Centers
- Tourism Marketing and Promotion Strategy
- Greater Tzaneen Development Agency

Batlhabine Soil Conservation

Tourism

Mefakeng Tourism development is engaged in community tourism development whereby 3 nodal areas have been identified. Initiatives to be implemented are: Thabina ecotourism, Muhlaba Bed and Breakfast and Nkowankowa Township tours. The establishment of Community tourism associations is also taking place through the Greater Tzaneen Tourism Association. The Municipality continues to manage the Olifants Information Centre together with Limpopo Tourism and Parks to ensure access to tourism information.

Agricultural Development Support

The Municipality has established the Land Claims Support Forum which meets quarterly with the Regional Land Claims Commission, Land bank, the Department of Agriculture and other relevant stakeholders. Mokgoloboto Community Property Association (CPA) has secured a market with Capespan. The Moshupatsela project is up and running and four co-operatives have been identified. The fresh produce market is also in the process of being established with a service provider appointed through Mopani District Municipality. Site visits are undertaken to support the Agricultural SMME. The Fruit and Nut Value Chain study was completed, which will assist investment attraction.

Business, SMME and skills development

The Municipality has been engaged in the extension of the Tzaneng mall development which is now completed. The Maake plaza is now under construction through McCormick developers. The Mamitwa dam development has started with consultative meetings and EIA studies. The European Union (EU) has granted R703,290 for the Hawkers Research and Feasibility study which will start January 2008. The Greater Tzaneen Development Agency is still in the establishment phase and will be completed in March 2008. Trade and investment Limpopo and EU are engaged in Capacity Building programmes for the LED unit and Mefakeng PMU is also capacitating the LED unit and the Community members through Tourism Development Agencies.

Community project support

Small businesses and Co-operatives are assisted daily with business registration, business plans through SEDA and LIBSA. Workshops were conducted often to SMME and Co-operatives in partnership with the Development agencies and the GCIS. The Department of Labour is also assisting with training.

Achievements:

- Participation in development of Tzaneen Crossing Extension
- Irish Aid funding for Community Tourism
- Completed Fruit and Nut Value Chain study
- LED Capacity Building Training through Wits University for 3 LED staff members in partnership with TIL
- Establishment of the Economic Development Agency
- Moshupatsela launched
- Mamitwa dam development process confirmed at the area
- 8 Broilers fro Rainbow farmers funded by Dept of Agric
- SAPEKOE tea Estate retention
- Mokgoloboto drying factory market in partnership with Capespan at Nkowankowa
- Participation in the Indaba Tourism Expo in Durban
- Received EU grant funding for Hawkers Research and Feasibility study to the value of R703,000

2.7.2 Town Planning Division

The purpose of the Town Planning function is to plan and manage land uses and land development. The Key Service Delivery Areas are Spatial Development Planning and Land use planning and management.

Programme Performance Analysis:

Spatial Development Framework (SDF)

Achievements:

• The SDF was reviewed and approved simultaneously with the IDP review.

- The Traditional Area Spatial Development Plans were drafted in conjunction with Traditional Authorities, as the first step to ensure coordination with the Traditional Authorities in terms of the future use of their land, and to make them aware of planning for optimal use of land, human safety and effective service delivery.
- Tzaneen Nodal Development Plan drafted, but final approval awaiting the outcomes of a Water and Sewer Analysis for Tzaneen town.

Challenges:

The absence of past forward planning documents and land development policies in rural areas. Awareness of need for rural planning in Traditional authority area and cooperation for responsible use of land.

Land Use Management and town planning applications

Achievements:

- The municipality established the townships Tzaneen Extension 78 and Dan Extension 2, to ensure the alienation of erven and compliance to the Breaking New Ground Policy.
- Facilitated the demarcation of the following stands in the rural areas:
 - o Formalisation of 900 sites at Nkomanini

o Mandlakazi: 300 sites

o Ga-Ramotshinyadi: 400 sites

o Petanenge: 300 sites

Berlyn/Mulati : 300 sites.

Muhlava Headkraal: 50 sites

o Ooghoek: 504 sites

o Mabyepelong: 293 sites

The number of town planning applications handled during 2006/07 is contained in Table 5. .

Table 5: Number of Town Planning Applications processed					
Category	Applications outstanding 1 July 2006	2006/07	Applications outstanding 30 June 2007		
Rezoning/permit	23	38	11		
Township Establishment/ extension	13	6	5		
Special Consent	0	9	0		
Reg. 188	0	0	0		
Subdivision/consoli dations	11	78	0		

Challenges:

- Growth in residential and business development in Tzaneen town, placed
 pressure on bulk service infrastructure and capacity, with specific reference to
 electricity, water and sewer. This resulted in the private sector providing bulk
 services as well as the delay in provision of serviced sites by the Municipality.
- Applications for new development which requires additional bulk water, sewer
 and electricity, is currently held in abeyance or withdrawn because it cannot be
 approved by Council.
- Existing vacant land with rights cannot be developed due to insufficient electrical capacity.
- There is a backlog of residential sites which has to be demarcated in rural (traditional) areas.
- The demarcation of sites does not take place in conjunction with servicing of the site. Headmen, Civic Organisations etc. still allocate sites illegally on traditional land.
- Timeframes to obtain Record of Decisions in terms of the Environmental Impact Assessment Regulations, are 8-24 months, which delays development.
- Land Ownership, especially on Traditional Land remains a challenge for any development.

2.7.3 Land, Property and Housing Administration Division

The Land Property and Housing administration Division is responsible for Municipal housing, Pioneers old age homes, RDP houses, the Valuation Roll, Change assessment rate, Interim supplementary valuations and Land management including;

Park closures, Street closures, Lease of land in liaison with legal division, Alienation of land and the expropriation of land.

Programme Performance Analysis

Municipal Housing:

Achievements:

• 12 Houses was sold and two awaiting decision from the Municipal Manager *Challenges*:

• Supply chain management process

Pioneers Old age homes (36 homes):

Achievements:

- Four people placed.
- We managed to reduce the rent to R350.00 per person.
- We are currently negotiating department of social development to subsidize the accommodation since this is their function.

Challenges -

Increased expenditure on maintenance

RDP houses (450 units allocated for 2006/2007 and 4 donated units)

Achievements:

- 150 PHP units completed at Sedan.
- 100 units were allocated to Sedan Village of which 97 was completed.
- 10 units were allocated to the Ba-Phalaborwa Municipality of which 8 units completed.
- 5 units allocated to Giyani Municipality with all at wall plates level and
- 35 allocated to Greater Tzaneen Municipality with 29 completed.
- 300 allocated for rural housing. Ward 1 was allocated 50, ward 7 allocated 150 and ward 9 allocated 100.
- 4 donated houses all completed.

Challenges:

- **Sedan PHP** slow disbursement of funds from the department. Slow delivery of building materials by suppliers e.g. There was a shortage of cement because of huge development in the Country.
- Rural housing the Municipality does not have powers over Developers since
 contracts are signed between the Department of Local Government and
 Housing and the Developers. This result slow progress and poor
 workmanship.

Valuation Roll and Land Management

Achievements:

- The service provider has been appointed. Public participation process was conducted in all towns as well as with the farmers Union.
- The property rate policy has been reviewed.
- Progress with regard to compilation of valuation roll at 10%. Interim valuation

Challenges:

• The dated for implementation has been postponed

Land Management

Achievements:

Table 6 presents the activities relating to Land Managent during 2006/07.

Table 6: Land management activities during 2006/07				
Activity	Number of sites	Zoning		
Properties leased		Zoning		
Road Reserved Area	6	Municipal		
Public Phones	4			
Municipal Houses	4			
Stand Sale	14	Residential		
Stand Sale	13	Business		
Stand Sale	3	Educational		
Donation to GTM	4	Farms		
Donation from GTM	1	Municipal		

Challenges:

• There are currently many sites Nkowankowa C that have not been sold, these sites are occupied but the people are not coming forward to pay

- Shortage of staff to administer the function
- The existing residential sites are not being serviced due to budget constraints.
- There are disputes on ownership of sites in Nkowankowa and Lenyenye township which need the intervention by the Legal Advisor

3. Human Resource and Organisational Management

For any organization to be successful, its human capital should be regarded and treated as the most important resource. For this purpose the Corporate Services Department was established with the main purpose to manage the following functions:

- Human Resources
- Administrative Support
- Legal Support
- Information Services

Programme Performance Analysis

3.1 Organisational design (OD)

Functional Organogram:

A comprehensive OD was conducted and a new Organogram (**Annexure A**) approved with effect form 1 July 2005. The revision of the Organisational Structure arises from the need to establish a service delivery orientated structure for the Municipality, which is aligned to the IDP. Minor additions to and amendments of the Organogram took place during 2006/7 to align it to the IDP and to address further needs. The service register increased slightly from 875 to 883 positions (8 positions).

Functional Structure Re-design:

Strategic functions were previously placed in different departments as well as directly under the Municipal Manager. These functions are now placed within the Office of the Municipal Manager, which will give the necessary strategic support to the Municipal Manager and to formulate policy.

The Department Strategy and Development was renamed to Department Planning and Economic Development with its main focus on planning, development and property administration. The Department Public Services was renamed to Department Community Services. The Parks, Recreation and Cemeteries function is placed in this Department. Provision was made for the broader law enforcement function (Law Enforcement with regard to all municipal by-laws) by the restructuring of the Traffic Department and Security. A new division was created to cater for all licensing functions and the testing of vehicles. Also, on the old structure the levels of command

were established in departments and sections. This was changed to Departments and Divisions followed by Sections and Sub Sections.

Since Electrical Engineering has to be transferred to the REDS in the near future, this service is being ring fenced to establish the functions that will stay behind at the Municipality. The functions identified to stay behind can immediately after the ring fencing is completed be transferred to the Engineering Services Department. For this purpose the Civil Engineering Department has been renamed to Engineering Services. Engineering functions were clustered by transferring Mechanical Services from the Finance Department to the Engineering Department. Housing Maintenance and Building Control were also clustered in a new Division named Building Management.

In terms of legislation such as the Municipal Finance Management Act, new functions were identified and provided for on the proposed structure that needs to be implemented in the short term, namely:

- Supply Chain Management
- Municipal Court

Staff Establishment:

The staff establishment was updated in line with the purposed functional structure and the IDP. This was used to populate the Organogram on the Org Plus System.

Report on functional structure:

A report with regard to the functional structure was submitted to Council and approved.

3.2 Task Job evaluation

Job Analysis Questionnaires (JAQs) for all positions were prepared after the training of 30 identified departmental representatives. Management, Shop Stewards and Interviewers were trained in the completion of JAQs & Job Descriptions (JDs). Draft Job Descriptions were compiled, verified and typed. Final JDs were signed by all parties involved. After the National moderation Committee has approved the 15 random selected JDs which was submitted to them, the approved Organogram, JAQs

and JDs were submitted to the Regional Task Job Evaluation Committee. The outcome of the job evaluation is being awaited.

The approval and implementation of the proposed organizational structure and job descriptions for the Municipality have the following potential advantages:

- Improved functional and organizational structuring of all the components of the Municipality which is aligned to the IDP;
- Elimination of the present problems being experienced with regard to control, communication and lines of authority;
- Specific and clearly defined responsibilities and accountability at all levels and for all components and demarcated job groupings;
- Job descriptions which contain detailed descriptions for the implementation of the organizational structure and for evaluation of posts;
- Elimination of lack of clarity and uncertainty among personnel with regard to their organization and the positions; and
- Productivity and performance of personnel can be improved; although the
 posts of the new organization structure have not been evaluated yet.

3.3 Labour

As on 30 June 2007, the staff register reflects the following:

Positions approved: 883

• Positions filled: 595

• Positions vacant: 288

The staff compliments for the seven departments is presented in Table 7.

Table 7: Staff compliment, 2006/07				
Department	Positions	Positions	Positions	
	Approved	filled	vacant	
Municipal Manager	55	38	17	
Planning & Economic	22	17	5	
Development				
Finance	59	44	15	
Corporate Services	34	29	5	
Engineering Services	253	161	92	
Community Services	340	203	137	

Table 7: Staff compliment, 2006/07				
Department Positions Positions Positions				
	Approved	filled	vacant	
Electrical Engineering	120	103	17	
Total	883	595	288	

Although the number of vacancies (32.6%) appears high cognizance must be taken that the Organogram was designed to cater for the needs for a period of five to ten years and that there are also financial constraints to fill all the positions needed in the particular financial year. A comparison between total personnel expenditure to total budget for the past five years is as presented in Table 8.

Table 8: 1 2006/07	Table 8: Personnel Expenditure versus the total budget, 2001/02 to 2006/07				
Year	Personnel Expenditure ²	Total Budget	%		
2001/02	R 58 417 205	R 194 824 456	29.98		
2002/03	R 59 930 618	R 204 468 743	29.31		
2003/04	R 56 791 828	R 226 609 538	25.06		
2004/05	R 63 556 842	R 274 061 622	23.19		
2005/06	R 70 993 634	R 329 631 453	21.54		
2006/07	R 83,725,900	R 329,472,551	25.41		

An increase in monetary terms of the personnel expenditure to the total budget will be observed. This is mainly due to the effect of multiyear salary/wage agreements which was settled above the CPIX.

Local Labour Forum (LLF) interactions and challenges:

The revised Organisational Rights Agreement (ORA) was implemented during 2005 and the LLF is sustained based on the stipulations of the Agreement by Council as Employer and the two recognized unions, namely, SAMWU and IMATU. Good relations were built by the parties since the inception of the LLF in 2003. Labour matters of mutual concern to all parties are regularly discussed in the LLF and special meetings are conducted when circumstances, e.g. contingency planning and maintenance of essential services necessitate it. The local Essential Services Agreement lapsed during 2005 and was renegotiated and signed. The Agreement was

² These amounts exclude councillor's allowances and expenditure for contracted services.

also submitted to the Essential Services Committee for ratification and the outcome is being awaited.

The LLF is also used as a medium to communicate important issues such as the restructuring of the electricity industry, water & sewerage, environmental health services, trade licensing, etc. to keep the unions abreast of developments. This creates a common understanding amongst all role players of the issues and challenges at stake and how it can influence their constituencies.

REDS Ring Fencing of Electricity Services Department:

In order to prepare the Municipality for the envisaged restructuring of the Electricity Industry, a comprehensive Section 78 or Ringfencing exercise was conducted. The HR Division used the EDI Holdings Toolkit as basis for the HR part of the exercise and conducted the work internally; whilst the external Consultant only did a quality assessment on the outcome. A breakfast seminar on HR Ringfencing was also conducted to other Municipalities in Limpopo to assist them with this matter. This exercise will be repeated early 2008 in Limpopo and Mpumalanga Provinces.

3.4 Disclosure of salaries, allowance and benefits

The salaries and allowances payable to councillors are presented in Table 9 and that of the Senior officials in Table 10.

Table 9: Councillor Allowances for 2006/07 to 2008/09 (R)

Levies – Bargaining Council	76,714	23,463	24,519	25,990	
Employee Related Costs -	17,360,402	19,457,905	20,333,511	21,553,522	
Social Contribution					
GRAND TOTAL	34,720,804	38,915,810	40,667,022	43,107,044	

The recognized medical aid schemes and pension/provident schemes in the municipality are presented in Table 13.

Table 13: Recognised Medical Aid Schemes and Pension Funds		
Medical Aid Schemes Pension / Provident Schemes		
Keyhealth	Joint Municipal Pension Fund	
Bonitas	Municipal Gratuity Fund	
Hosmed	Municipal Employee Pension Fund	
LA Health	National Fund for Municipal Workers	
SAMWUMED	Municipal Councillor Pension Fund	

Based on the latest financial statements of the latter schemes perused, it appears that the financial position of these schemes is sound and poses no real risk for the Municipality.

3.5 Councillors arrears on consumer accounts

The following Councillors had arrear accounts outstanding for more than 90 days as at 30 June 2006 (See Table 14):

Table 14: Councillor arrears on accounts, 30 th June 2007				
Councillors	Outstanding less than	Outstanding more than 90		
	90 days	days		
M W Mogoboya	494.10	1,062.03		
J H Nkwinika	781.99	513.01		
S T Mapimele	673.33	1,885.67		
M Sibiya	1,017.19	3,511.81		
Total	2,966.61	6,972.52		

3.6 Contract Dispensation for Heads of Division

Since 1 December 2004 the heads of division was given the opportunity to revert from permanent status to a five year fixed term contract dispensation coupled to the signing of performance agreements and participating in the reward scheme. All the heads of division reverted to the contract dispensation which brought them in line with the position of the Section 57 managers.

In order to determine the remuneration of the Section 57 managers and heads of division, a Remuneration Committee was established which consist of three councillors as employer representatives and an external salary expert. This Committee finalized a Remuneration Policy and Remuneration Structure for the mangers and heads of division which was implemented with effect from 1 December 2004.

The above dispensation created the opportunity to cascade the Performance Management System (PMS) from the top seven to the top 34 positions in the Municipality. However, due to an Award & Settlement between organized labour and SALGA, the existing fixed term contracts of heads of division (on job level 3) must be phased out to permanent positions again. The implication is that present fix term contracts will continue until individual contracts lapses from which dates those employees will revert back to the permanent dispensation on the salary scales and the terms of conditions of service then applicable to permanent employees. The further implication is that newly appointed heads of division on reporting level 3 forthwith will be appointed on the remuneration and other conditions of service applicable to permanent staff on that level.

3.7 Employment Equity

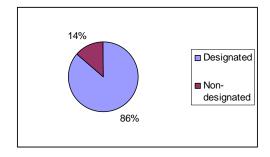

The position in terms of representivity of the workforce profile as on 30 June 2007 is as follows (see Table 15 & Figure 1):

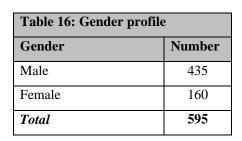

Figure 1: Designated and Nondesignated positions

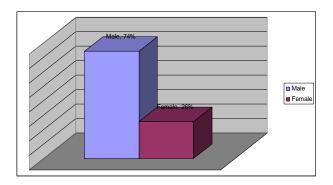

Table 15: Population employees	group of
Population group	Number
Black	509
White	81
Coloured	4
Indian	1
Total	595

As far as gender is concerned, the position as on 30 June 2006 is as follows (see Table 16 and Figure 2):

Figure 2: Gender profile

In terms of appointment of people with disabilities, as on 30 June 2007, the Municipality has achieved nearly 1.5% against the national benchmark of 2%.

The Employment Equity (EE) Plan and Targets were revised during June 2006 for the next five years (2006 - 2011). The Employment Equity Consultative Forum is operational and in support of the EE Project. The identified nine strategic objectives are being used as basis to drive the equity agenda.

The Personnel Provisioning Policy is merely one of the instruments used to achieve equity in the workplace and therefore, the policy was revised and approved afresh by Council during February 2005. Cognizance must be taken of the fact that

procurement in employment equity entails more than just designated versus nondesignated appointments. It also covers gender and disability aspects which are being pursued as a challenge.

A survey regarding the accessibility of buildings and amenities were conducted and will be addressed through the IDP by the Engineering Services Department in future years.

3.8 Personnel Administration

The Personnel Administration Section is functioning very well despite the fact that two of the five positions in the Section are vacant. Table 17 presents the workload of the Personnel Administration staff.

Table 17: Service provision with regard to administration during 2006/07	personnel
Type of service	Number of
	cases
Paying work outside Council approved	14

Disciplinary cases recorded	22
Grievances recorded	0
Local Labour Forum meetings held	8
Job descriptions prepared and signed	23

Surveys conducted:

A Perception, Attitude & Morale Survey was conducted for 2005 and again for 2007 and the results were interpreted and analyzed and used as basis to recommend to Council on various issues of importance to improve the affectivity of the Municipality. An Internal Client Survey was also developed internally and conducted for the Corporate Services Department for 2007. The results hereof will be used as benchmark for future surveys.

3.9 Skills Development

The Greater Tzaneen Municipality is committed to skills development and fully subscribes to the provisions of the National Skills Development Strategy.

Development Strategy:

The Work Place Skills Plan (WSP) for the 2006/2007 financial year was submitted to the Local Government SETA (LGSETA) and has been implemented.

Training Budget:

As an indication of the Municipality's commitment to skills development, an amount of R867,355 was budgeted for skills development during the 2006/2007 financial year. The money was used to finance training interventions which had been identified to address the skills gaps in the Municipality. The training interventions are conducted by accredited training providers to ensure quality of provision.

Adult Basic Education and Training:

The Local Government SETA (LGSETA) has granted Council funding amounting to R126 000 for the training of 70 employees on ABET. Project Literacy was appointed to conduct the interventions. The programme started in February 2007 and will conclude in December 2007.

Implementation of Learnerships:

LED Learnerships - Five (5) unemployed learners are currently participating in the programme. The learnership is funded by the LGSETA.

Community Development Worker Learnerships - Eight (8) unemployed learners are enrolled for the programme.

Electricity Learnerships - Due to financial constraints these learnerships could not be implemented during 2007. The Municipality will be implementing these learnerships during 2008. Ten (10) employed learners and five (5) unemployed learners will participate in the learnership.

Other Learnerships - A needs analysis for the implementation of other learnerships will be conducted in all the Departments in Council. These learnerships will hopefully be implemented during 2008. Table 18 provides a summary of all learnerships introduced in 2006/07.

Table 18: Learnerships introduced, 2006/07				
Number of				
Function	Learnerships			
Water	0			
LED	5			
Community Development				
Workers	8			
Youth Development	0			
Electricity	0			
Total	13			

One remaining intervention for employees, Finance for Non Financial Managers, will be done during 2008. A service provider for the programme has been identified. The programme could not be done during 2007 due to financial constraints. Council has to contribute 40% of the training cost and DBSA 60%. The employee qualification profile is attached as **Annexure B.**

3.10 Occupational Health and Safety

Occupational injuries and diseases:

Reported injuries on duty as on 30 June 2007 were 28. For the same period (July – June) in 2006/2007 financial year, there were 28 reported injuries on duty. No occupational disease was reported for the same period in 2006/2007 financial year. Direct man-hour lost due to occupational injuries was 569.15 hours. There was no fatal injury.

Occupational Health & Safety Committee Meetings:

As on 30 June 2007, 16 OHS Committee meetings were held.

Occupational Stressors Monitoring:

Occupational hygiene monitoring equipment, i.e. gas detectors used to check risk factors (asphyxiation-insufficient oxygen) in confine spaces (sewage manholes), Lux meter to check quality and adequacy of light in offices and workshops, and sound level meter to check level of occupational exposure to noise, were used to monitor these stressors (asphyxiates, poor lighting, noise). Where deviations occurred, recommendations were given to supervisors/superintendents to reduced stressors to acceptable levels e.g. addition and/or replacement of lights in offices and workshops, purging of manholes before entering, repairing noise machinery and use of earplugs/muffs.

Employee Assistance Programme (EAP):

As on 30 June 2007, 25 employees utilized the EAP to seek assistance in resolving personal problems ranging from chronic illness (TB & HIV/Aids), emolument attachments orders, loan sharks, marital affairs and alcohol abuse. Out of 25 cases, 21 were successfully dealt with. Health talks regarding prevention of HIV and tuberculosis at work were given during health and safety committee meetings to members of the committee who are having weekly health and safety talks in their respective workplaces.

3.11 Administrative Support Services

The purpose of the Administrative Services Division is as follows:

- To render committee services to the Council and its committees through:
 - Co-ordinate translation activities
 - Provide meeting support services
- To render office auxiliary services by:
 - Providing archiving services
 - Providing messenger services
 - Providing cleaning services
 - Providing typing services
 - Providing reprographic services
 - Rendering telephone services

Programme Performance Analysis

Study groups and clusters:

In order to assist the Executive Committee to discharge their responsibilities contemplated in the Structures and Systems Act, the Council has established Section 80 Committees as working committees (Study Groups) of the Executive Committee. A chairperson has been appointed for each of the six clusters. The following clusters were established in line with the Institutional & Strategy Map, as contained in the IDP:

- Economic
- Social
- Infrastructure
- Governance and Administration
- Finance
- Sport, Arts and Culture

The different study groups resort under each cluster. Councillors have been appointed on the different study groups. The study groups are mandated to research and make recommendations on specific topics i.e. public participation, communication, water, electricity etc. In this way Councillors play a leading role in the decision making process and also give political direction on matters serving before the Council. Presently all items are referred to the relevant Study Group to make a recommendation to the Executive Committee. In this way Councillors take ownership of the items that are submitted to Council.

Representatives of Ward Committees participate at study group level where they must give their inputs.

Installation of the collaborator system:

The Council has resolved to appoint Messrs Business Engineering with regards to the deployment, implementation and commissioning of the Collaborator System within our municipality. The company has made an on-site official available who is presently facilitating training of all individuals on the use of the collaborator system.

Business Engineering has also made an official available to ensure that the overall implementation of the system meets with the set requirements. Significant progress has been made with the installation of the system.

The records office has been scanning all mail received at the municipality for the past couple of months. Electronic filing is presently being performed on all scanned documents. The electronic distribution of correspondence to all departments takes place on a daily basis. The items tracking and resolution management process has in the meantime been implemented by the service provider. The smooth implementation of the Collaborator System is dependant on the co-operation of each and every official because the system is people driven. The buy-in by everybody is thus necessary to ensure the success of the system.

Storage Space: Records Office:

The records office is presently experiencing problems with filing space. Hopefully this problem can be solved in the near future with the buying of three new Zippel filing cabinets.

Identification of Training Needs:

Training needs were identified and a number of officials in the Administrative Division attended various training courses. The following training opportunities were also attended:

- Performance Management Workshop
- Communication Workshop
- Delegation Workshop
- Two Strategic Sessions
- IMASA Conference

A number of officials in the Division are busy with further studies to improve their career opportunities.

Client Survey:

During a client survey by internal customers which was conducted for the Corporate Services Department during February and March 2007 a score of 76% was achieved for the overall level of services by the Administration Section.

Institution of Municipal Administration for Southern Africa (IMASA)

The Corporate Services Manager: Mr. ES Maake was elected as Chairperson of the Institute of Municipal Administration for Southern Africa (Limpopo Branch) and he is also a member of the Executive Council of IMASA Nationally.

Visit by Representatives of Blouberg Municipality:

Following a request by the Municipal Manager of the Blouberg Municipality representatives of the said Municipality visited our Municipality during the period 6-8 March 2007 to learn good practices with regard to *inter alia* the following:

- Organization structure
- Policies
- Implementation of By-Laws
- Resolution management
- Councillors support
- Public Participation mechanism
- Record management

International relations:

Efforts have been made to foster relations with municipalities abroad. In the pursuance of the relations the municipality was part of the visit by the Limpopo Provincial Government to Mozambique's Gaza Province in November 2006. The visit offered the municipality an opportunity to interact with the Xai Xai Municipality. The delegation that went to Xai Xai took the opportunity of being in Mozambique to come back via Matola Municipality which we had already started interaction with in the previous years.

The interaction with Matola Municipality has resulted in a draft Memorandum of Understanding which is now in the possession of both municipalities. A meeting

between the municipalities was intended to take place at end of the September 2007, unfortunately, it could not be held due to budgetary constraints. Once the Memorandum of Understanding is concluded, the conduct of relations with Matola Municipality would be on its basis.

Further efforts have been made to foster relations with a municipality in Netherlands. A profile of our municipality has been sent to the South African Embassy in Netherlands to assist in identifying a suitable municipality with which the Greater Tzaneen Municipality may foster relations. The matter is still being considered by the Ambassador and would report back to us.

3.12 Legal services

The purpose of Legal services is to provide specialized legal services including Contract, Policies and by-laws drafting, to ensure sound administration and management of the Greater Tzaneen Municipality.

4. Audited statements and Related Financial Information

The Financial Statements for GTM have been submitted on time i.e. 31 August 2007 (**Annexure C**). The Percentage Payment rates for municipal accounts per different towns are reflected in Table 19.

Table 19: Percentage payment rates per town							
Town	2006/2007	2005/2006

5.3 Finance and Administration

Table 22:	e and Administration			
Function:	Finance and Administration			
Sub Function:	Finance Finance			
Reporting Level	Detail	Total		
Overview:	Includes all activities relating to the finance function of the municipality. Note: grants information should appear in Chapter 4 on Financial Statements and Related Financial Information.			
Description of the Activity:	The function of finance within the municipality is administered as follows and includes:			
	To ensure effective revenue management through accurate meter reading, billing, credit and cash control			
	The municipality has a mandate to: To ensure there is proper and effective revenue management in the municipality.			
	The strategic objectives of this function are to: To integrate and manage all revenue functions and systems.			
	The key issues for 2006/07 are: 1. The audit of the billing system of Nkowankowa and Lenyenye; 2 The management of the Meter Reading Service Level Agreement to ensure 98% of the meters are read on a monthly basis; and			
	3. The implementation of the debt moratorium strategy with the objective of collecting rates and services charge debts.

5.8 Waste Management

	Management		
Table 31: Function: Waste	management		
Sub Function: So			
Reporting level	Detail	Total	Cost
Description of			
the activity	Level of service:		
	Removal services		
	a) A full kerbside collection service is rendered to all communities in the following suburbs of Greater Tzaneen		
	Municipality, which represents only 11% of all households.		
	All residential, business, industrial and health care waste are		
	removed from viz: Tzaneen, Nkowankowa, Lenyenye,		
	Letsitele, Haenertsburg [at present 160 000 m3 non-		
	compacted waste / annum] b) All residential, business, industrial and health care waste		
	are removed viz: Tzaneen, Nkowankowa, Lenyenye,		
	Letsitele, Haenertsburg on a weekly basis scheduled per		
	extensions		
	Litter picking/ street cleaning		
	a) All streets, main roads public spaces [taxi & bus ranks]		
	are cleaned on a regular and period schedule from all debris and solid waste [6 000 m ⁻³ p.a.]		
	b) All route are cleaned in accordance with an appropriate		
	route sheet/s		
	c) All public taxi - & bus ranks are continuously serviced		
	and cleaned on a pre-determined schedule.		
	Public Off loading facilities		
	a) Public- off- loading – facility each at: - Nkowankowa,		
	Lenyenye, Letsitele, and Haenertsburg. [Only for OFF-		
	LOADING by the Public: NOT A TRANSFERSTATION] b) 6m³ skips utilized for this purpose and are cleaned on a		
	daily basis at the Tzaneen Regional Landfill.		
	c) All P.O.F.s (public offloading facilities) are managed by a		
	MSP (Waste Group Ingwe)		
	d) No municipal employee utilized at these facilities.		
	Public Toilets		
	a) 10 x public toilet blocks managed by Tzaneen Solid		
	Waste in Tzaneen (6), Nkowankowa (1), Letsitele (1),		
	Haenertsburg (1) and Lenyenye (1)		
	b)Blocks open for 12 hours daily		
	c)Cleaning and disinfecting of blocks every 2.5 hours d)Provision of toilet paper for free		
	Landfill site		

Function: Wast Sub Function: S	_		
Reporting level		Total	Cost
	a) 1x Regional landfill, 4 km. from Tzaneen. [12ha in size.]		
	b) Fully permitted from 1/12/2004 as a G.M.B- site.		
	c) Landfill being managed by a M S P (Waste Group Ingwe) in compliance with spec's from the I.W.M.P.[Integrated Waste Management Plan]		
	d) Managed in accordance with construction plan – cell building method Backlogs		
	A) 0% of households in the total rural areas, representing ±80034 households.		
	b) The cost to address the service in full with immediate effect, will be approximately R40, 000,000-00 per annum for all 129x villages.		
	Geographical distribution The jurisdiction area is divided by the main roads from Politsi via Tzaneen, Tarentaalrand, Letsitele and Trichardtsdal, in a Northern and Southern service region		
	Solid waste strategies: Waste Minimisation through recycling, composting, re-use and rural waste minimisation		
	Waste collection and transportation - kerbside collection, bulk removal, medical waste removal, toxic waste removal, litter picking and fleet management		
	Disposal and treatment at permitted facilities and sites and public off-loading sites		
	Pollution control by operationalisation of toilet blocks and effective law enforcement		
	Management information systems through appropriate IT system, effective administration and information distribution to clients		
nalysis of the unctions.

Purification. Bulk distribution. Reticulation. Maintenance. Client satisfaction.	We have planned to render a 24 hour service to Urban areas on a 100% base, wherein we succeeded on implementing this plan on a 90% basis.	90%	100%

5.12 Electricity

Table 35: Function: Electricity				
Sub Function: Electricity Distribution				
Reporting Level	Detail	Total	Cost	
Overview	The Electrical services department's main function is to distribute and sell electricity within its licensed area. It is responsible for constructing networks, connecting customers and repairing and maintaining networks. It is also responsible for maintaining public lighting and street lights. The Greater Tzaneen Municipality consumers consist of domestic, agricultural, industrial and business customers.			
Description of the activity	The electricity purchase and distribution functions of the municipality are administered as follows and include: New connections Upgrading Down grading Extension of network The municipality has a mandate to act in accordance to its Distribution Licenses as issued by the National Electricity Regulator of South Africa (N.E.R.S.A). The strategic objective of this function is to: Address ongoing maintenance, and accumulated maintenances of backlog of 2000km of electrical distribution lines over a period of 10 years starting 2002/2003 financial year. To improve and provide service delivery in a sustainable manner by ensuring sufficient electrical distribution system capacity. To ensure safe and sustainable basic electricity services for ±35000 households in the Greater Tzaneen Municipality area. To ensure free basic electricity (EBSST-FBE) to all indigent households within the Greater Tzaneen Municipality area. To positively contribute towards the improvement of public safety and security. To ensure occupational health and safety within the workplace.

	•To monitor and acquire statistical data on the			
	performance of the distribution network.			
	•Interacting with consumers to ensure continuity of			
	supply and monitoring of problem areas.			
	The key challenges for 2006/2007 include the			
	following: The electrical distribution system which is not			
	maintained up to standard, due to shortage of funds.			
	Insufficient electrical capacity due to increased			
	demand in the distribution area.			
	Electrification backlogs in villages.			
	Electricity system monitoring and complying with the regulations and specifications.

Description				
of the	The street lighting responsibilities are administered as			
activities	follows: * Operational Budget is allocated for maintenance of lights * Capital budget is allocated for installation of new lights The municipality has a mandate to:			
	* Install lights in public places, streets and strategic areas * Sustain the lightning by maintaining the lights installed The strategic objection of this function are to: * To provide sufficient light to the communities * To positively contribute towards the improvement of public safety			
	The Key issues for 2006/2007:			
	Include the backlog in Nkowankowa, Lenyenye and other Villages in the provision of streetlights			
Analysis of the Function	Number and total operating cost of streetlights serving population:	2677	231,459.00	
	Total bulk kilowatt hours consumed for street lighting:	381 000	1,561,781.50	

6. Conclusion

The Greater Tzaneen Municipality 2006/2007 Annual Report gives a detailed account of the achievements, challenges and strategies as accomplished through prioritised service delivery. The Municipality seeks to report to our communities and stakeholders on all aspects relating to Financial management, viability, good governance, Local Economic Development, basic service delivery, municipal transformation and organizational development by being transparent and open to the public.

The 1st of March 2006 Local Government Elections gave the Mayor and Councillors a new mandate to promote the delivery of services in a sustainable, efficient and effective manner. The Greater Tzaneen Municipality commits itself to support the promotion of Local Economic growth that will address economic disparities and integrated human settlement through sustainable service delivery.

The IDP, as the 5-year development plan of the Municipality contains our strategic intent with regard to service delivery. Service delivery challenges (backlogs) and the projects to be implemented in an attempt to eradicate these backlogs are also presented. We therefore pride ourselves that the IDP, PMS and budget is aligned. It is with confidence that the Municipality will continue to strive to have a positive impact on the lives of our communities by delivering services that will enhance the quality of living. Our achievements were recognised during the Provincial Cleanest Town competition and the Provincial Vuna Awards.

The leadership of the Municipality and Manager would like to thank all its dedicated staff, support from its stakeholders and business community throughout the Municipal area. Our special thanks to the entire of Greater Tzaneen for your unwavering support and understanding.
